

## The Patient Portal

is a link to your personal electronic health record. It is a great resource regarding your personal health and medical information.

The Patient Portal will have more features added in the future. Today, the biggest benefit in signing up for the portal is that it will give you an easy way to sign documents electronically, without having to make a trip to the office. During the COVID-19 pandemic, signatures were waived and we were allowed to accept your verbal agreement on plans and documents. However, beginning in 2022, signatures will again be required. You will be able to sign documents in the Patient Portal at your convenience in your own location.

To get started with your Patient Portal, please give us a call to receive your PIN (Personal Identification Number)

**(800) 337-8598**

## PORTAL MENU

### My Home

This is the starting spot and holds your health record information.

### My Personal Information

Here you will see the names, phone numbers and other information for the people you indicated should be contacted when needed.

### My Health Record

This section has five areas you can access to learn about your health. View your allergies, your diagnosis, the medications you are taking, your blood pressure, weight, and other “vitals.” When tests are done at a laboratory (for example blood, urine) results can be seen here.

### Documents

Here you can see health information that you have asked for or your agency has sent to you.

### My Appointments

Here you can see if you have an appointment coming up. You can learn what day, what time and where it is.

### My Account

Here you can update your account information (name, email address, password) and view account usage history.

## Future Direction for the Patient Portal

In the future, the Patient Portal will grow to provide more ways you can communicate about your health and wellness.

For example, in the future you may be able to:

- Review information from your last appointment including your diagnosis, prescribed medications, and vital signs.
- Share this information with your primary care physician or specialist.
- Request medication refills at the time you notice they are needed.
- Request your personal records. They will be uploaded to your Portal where you can print or share them.
- Request information on a health-related topic to be uploaded to your Portal.
